

TRS-ActiveCare maintenance drug list

The following maintenance drug list contains medications that you may be taking on a long-term basis for conditions such as high blood pressure or high cholesterol. Your TRS-ActiveCare prescription drug benefit has set a limit on the number of times you can fill prescriptions for these long-term medications (as covered by your plan) at a participating retail pharmacy before your retail co-payment increases.

TRS-ActiveCare may have sent you a letter explaining this change, which may have included information about the cost savings you can take advantage of by using **Medco By Mail** for your long-term medications.

To look up a specific medication, click on **the letter tab at the right side of the page** that corresponds with the name of your medication. For example, if you are looking for *Nasonex*, click the N tab and scroll through the list of medications.
